PASSIVE SMOKING

January 1972 through September 1980

162 Citations

Prepared by Philip Wexler

Citations cover effects of ambient tobacco smoke. Specifically, these are the effects of one person's smoking upon another person, especially in enclosed spaces. This phenomenon is variously referred to as passive smoking, involuntary smoking, surrogate smoking, second-hand smoking, or forced smoking. Fetal effects have been omitted. Health, ethical, social, legislative, and psychological issues are considered. Factors such as tobacco sensitivity, indoor filtration, and measurement and analysis of relevant tobacco smoke constituents are included. Supplementary citations are contained in the Addendum.

best copy available

This bibliography contains references to recent articles selected from some 3,000 English and foreign language journals and a limited number of monographs. Articles from these journals and monographs are indexed for inclusion in *Index Medicus* and other bibliographies produced by the National Library of Medicine. The references in this Literature Search were retrieved from NLM's MEDLINE data base; the dates above show the period during which the references were added to MEDLINE.

Each citation is listed with the descriptors selected from NLM's list of Medical Subject Headings (MeSH) under which the article was indexed. MeSH descriptors of most significance in an article are identified with an asterisk. The article cited will be found in *Index Medicus* only under these starred descriptors.

A bracketed title indicates the article is in a foreign language. For foreign language articles the designation ENG.ABSTR. follows the publication date if the article includes an English abstract; language abbreviation in parenthesis follows.

A full explanation of the elements included in each citation, as well as a complete list of current NLM Literature Searches are included in *Index Medicus and Abridged Index Medicus*. To obtain a current list of Literature Search titles, write: Literature Search Program, Reference Section, National Library of Medicine, 8600 Rockville Pike, Bethesda, Maryland 20209. Please include your name and address typed on a gummed label (no return postage necessary).
